Protein Structure and Molecular Enzymology
Cumulative Contents

Rapid report

Tryptophan phosphorescence signals characteristic changes in protein dynamics at physiological temperatures
F. Tölgyesi, B. Ullrich and J. Fidy (Hungary) 1

Regular papers

Crystal structure at 1.63 Å resolution of the native form of porcine β-trypsin: revealing an acetate ion binding site and functional water network
A. Johnson, N. Gautham and V. Pattabhi (India) 7

Differential substrate behaviour of phenol and aniline derivatives during conversion by horseradish peroxidase
M.J.H. Van Haandel, M.M.J. Claassens, N. Van der Hout, M.G. Boersma, J. Vervoort and I.M.C.M. Rietjens (The Netherlands) 22

A siderophore from *Pseudomonas putida* type A1: structural and biological characterization
E. Boopathi and K.S. Rao (India) 30

Horseradish peroxidase monitored by infrared spectroscopy: effect of temperature, substrate and calcium
A.D. Kaposi, J. Fidy, E.S. Manas, J.M. Vanderkooi and W.W. Wright (Hungary, USA) 41

Species differences in the sites of cleavage of pro-lactase to lactase supports lack of selective pressure
L. Zecca, J.E. Mesonero, S.M. Gloor and G. Semenza (Italy, Switzerland) 51

A family of *Arabidopsis* plasma membrane receptors presenting animal β-integrin domains
V. Laval, M. Chabannes, M. Carrière, H. Canut, A. Barre, P. Rougé, R. Pont-Lezica and J.-P. Galaud (France) 61

Phospholipids stabilize the secondary structure of the sodium-coupled branched-chain amino acid carrier of *Pseudomonas aeruginosa*
Y. Uratani, M. Kobayashi, Y. Yokoyama, T. Maeda, S. Mitaku and T. Hoshino (Japan) 71

Identification and expression of gastrin and cholecystokinin mRNAs from the turtle, *Pseudemys scripta*: evidence of tissue-specific tyrosyl sulfation
L. Jønson, J.R. Bundgaard, A.H. Johnsen and I.J. Rourke (Denmark) 84

Primary structure and unusual carbohydrate moiety of functional unit 2-*c* of keyhole limpet hemocyanin (KLH)
S. Stoeva, J. Schütz, W. Gebauer, T. Hundsdörfer, C. Manz, J. Markl and W. Voelter (Germany) 94

Purification of cytosolic β-glucosidase from pig liver and its reactivity towards flavonoid glycosides
N. Lambert, P.A. Kroon, C.B. Faulds, G.W. Plumb, W.R. McLauchlan, A.J. Day and G. Williamson (UK) 110

Novel bacterial peroxidase without catalase activity from *Flavobacterium meningosepticum*: purification and characterization
S. Koga, J. Ogawa, Y.-M. Choi and S. Shimizu (Japan) 117

Helical structure and self-association in a 13 residue neuropeptide Y Y2 receptor agonist: relationship to biological activity
K.J. Barnham, F. Catalfamo, P.K. Pallaghy, G.J. Howlett and R.S. Norton (Australia) 127

Conformational studies of the C-terminal domain of bacteriophage Pf1 gene 5 protein
D.G. Fox, P.D. Cary and G.G. Kneale (UK) 138

A novel mammalian nuclear protein similar to *Schizosaccharomyces pombe* Prp1p/Zer1p and *Saccharomyces cerevisiae* Prp6p pre-mRNA splicing factors
A. Nishikimi, J. Mukai, N. Kioka and M. Yamada (Japan) 147

Biochemical evidence that *Escherichia coli hyi* (orf b0508, *gip*) gene encodes hydroxypyruvate isomerase
M. Ashiuchi and H. Misono (Japan) 153

Occurrence of D-amino acids in a few archaea and dehydrogenase activities in hyperthermophile *Pyrobaculum islandicum*
Y. Nagata, K. Tanaka, T. Iida, Y. Kera, R.-h. Yamada, Y. Nakajima, T. Fujiwara, Y. Fukumori, T. Yamanaka, Y. Koga, S. Tsuji and K. Kawaguchi-Nagata (Japan) 160

Primary structure of hemolytic lectin CEL-III from marine invertebrate *Cucumaria echinata* and its cDNA: structural similarity to the B-chain from plant lectin, ricin
M. Nakano, S. Tabata, K. Sugihara, Y. Kouzuma, M. Kimura and N. Yamasaki (Japan) 167

A graphical method of analyzing pH dependence of enzyme activity
J. Wang, T. Araki, M. Matsuoka and T. Ogawa (Japan) 177

Short sequence-paper

Molecular cloning and characterization of a new fasting-inducible short-chain dehydrogenase/reductase from rat liver
J. Zhang and L.E. Underwood (USA) 184

Short crystallization-paper

Human ferrochelatase: crystallization, characterization of the [2Fe-2S] cluster and determination that the enzyme is a homodimer
A.E. Burden, C.-K. Wu, T.A. Dailey, J.L.H. Busch, I.K. Dhawan, J.P. Rose, B.-C. Wang and H.A. Dailey (USA) 191
